

FCGRT Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP19288b

Product Information

Application	WB, E
Primary Accession	P55899
Other Accession	NP_004098.1
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Clone Names	RB39368
Calculated MW	39743
Antigen Region	330-357

Additional Information

Gene ID	2217
Other Names	IgG receptor FcRn large subunit p51, FcRn, IgG Fc fragment receptor transporter alpha chain, Neonatal Fc receptor, FCGRT, FCRN
Target/Specificity	This FCGRT antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 330-357 amino acids from the C-terminal region of human FCGRT.
Dilution	WB~~1:1000 E~~Use at an assay dependent concentration.
Format	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	FCGRT Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

Protein Information

Name	FCGRT
Synonyms	FCRN
Function	Cell surface receptor that transfers passive humoral immunity from the

mother to the newborn. Binds to the Fc region of monomeric immunoglobulin gamma and mediates its selective uptake from milk (PubMed:[10933786](#), PubMed:[7964511](#)). IgG in the milk is bound at the apical surface of the intestinal epithelium. The resultant FcRn-IgG complexes are transcytosed across the intestinal epithelium and IgG is released from FcRn into blood or tissue fluids. Throughout life, contributes to effective humoral immunity by recycling IgG and extending its half-life in the circulation. Mechanistically, monomeric IgG binding to FcRn in acidic endosomes of endothelial and hematopoietic cells recycles IgG to the cell surface where it is released into the circulation (PubMed:[10998088](#)). In addition of IgG, regulates homeostasis of the other most abundant circulating protein albumin/ALB (PubMed:[24469444](#), PubMed:[28330995](#)).

Cellular Location	Cell membrane {ECO:0000250 UniProtKB:P13599}; Single-pass type I membrane protein. Endosome membrane
Tissue Location	Expressed in full-term placenta, heart, lung, liver, muscle, kidney, pancreas, and both fetal and adult small intestine.

Background

This gene encodes a receptor that binds the Fc region of monomeric immunoglobulin G. The encoded protein transfers immunoglobulin G antibodies from mother to fetus across the placenta. This protein also binds immunoglobulin G to protect the antibody from degradation. Alternative splicing results in multiple transcript variants.
