

CHCHD3 Antibody (Center)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP20731c

Product Information

Application WB, E **Primary Accession Q9NX63** Reactivity Human Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB48603 **Calculated MW** 26152

Additional Information

Gene ID 54927

Other Names MICOS complex subunit MIC19, Coiled-coil-helix-coiled-coil-helix

domain-containing protein 3, CHCHD3, MIC19, MINOS3

Target/Specificity This CHCHD3 antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 83-116 amino acids from the Central

region of human CHCHD3.

Dilution WB~~1:1000 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions CHCHD3 Antibody (Center) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name CHCHD3

Synonyms MIC19, MINOS3

Function Component of the MICOS complex, a large protein complex of the

mitochondrial inner membrane that plays crucial roles in the maintenance of crista junctions, inner membrane architecture, and formation of contact sites

to the outer membrane (PubMed:<u>25781180</u>, PubMed:<u>32567732</u>, PubMed:<u>33130824</u>). Plays an important role in the maintenance of the MICOS complex stability and the mitochondrial cristae morphology

(PubMed:<u>25781180</u>, PubMed:<u>32567732</u>, PubMed:<u>33130824</u>). Has also been shown to function as a transcription factor which binds to the BAG1 promoter

and represses BAG1 transcription (PubMed: 22567091).

Cellular Location Mitochondrion inner membrane {ECO:0000250 | UniProtKB:Q9CRB9};

Lipid-anchor; Intermembrane side {ECO:0000250 | UniProtKB:Q9CRB9}.

Cytoplasm. Nucleus Mitochondrion

Tissue Location Detected at low levels in brain, placenta, lung, liver, kidney and pancreas with

increased levels in heart and skeletal muscle. Higher expression in primary

lung cancers than in normal lung tissue.

Background

Required for maintenance of mitochondrial crista integrity and mitochondrial function. May act as a scaffolding protein that stabilizes protein complexes involved in crista architecture and protein import. Has also been shown to function as a transcription factor which binds to the BAG1 promoter and represses BAG1 transcription.

Images

Western blot analysis of lysate from 293T cell line, using CHCHD3 Antibody (Center)(Cat. #AP20731c). AP20731c was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.
