

(Mouse) Sox17 Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP21226b

Product Information

Application WB, E **Primary Accession** Q61473

Reactivity Human, Rat, Mouse

Host Rabbit
Clonality polyclonal
Isotype Rabbit IgG
Clone Names RB52367
Calculated MW 44646

Additional Information

Gene ID 20671

Other Names Transcription factor SOX-17, Sox17, Sox-17

Target/Specificity This mouse Sox17 antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 353-387 amino acids from the

C-terminal region of mouse Sox17.

Dilution WB~~1:2000 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.05% (V/V) Proclin 300. This

antibody is purified through a protein A column, followed by peptide affinity

purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions (Mouse) Sox17 Antibody (C-term) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name Sox17

Synonyms Sox-17

Function Acts as a transcription regulator that binds target promoter DNA and bends

the DNA (PubMed: 19328208, PubMed: 24153254, PubMed: 8636240). Binds to the sequences 5'-AACAAT-'3 or 5'-AACAAAG-3' (PubMed: 8636240). Modulates transcriptional regulation via WNT3A. Inhibits Wnt signaling. Promotes

degradation of activated CTNNB1. Plays a key role in the regulation of embryonic development (PubMed:11973269, PubMed:17655922, PubMed:24153254). Required for normal development of the definitive gut endoderm (PubMed:11973269). Required for normal looping of the embryonic heart tube. Plays an important role in embryonic and postnatal vascular development, including development of arteries (PubMed:24153254). Plays an important role in postnatal angiogenesis, where it is functionally redundant with SOX18 (PubMed:16895970). Required for the generation and maintenance of fetal hematopoietic stem cells, and for fetal hematopoiesis (PubMed:17655922). Probable transcriptional activator in the premeiotic germ cells.

Cellular Location Nucleus {ECO:0000255 | PROSITE-ProRule:PRU00267,

ECO:0000269 | PubMed:20802155, ECO:0000269 | PubMed:24153254,

ECO:0000269 | PubMed:8636240}

Tissue Location Detected in lung and testis (PubMed:8636240). Detected in endothelial cells

around small and large arteries in newborns and adults, but is barely

detectable in veins (at protein level) (PubMed:24153254).

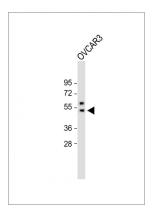

Background

Acts as transcription regulator that binds target promoter DNA and bends the DNA. Binds to the sequences 5'- AACAAT-'3 or 5'-AACAAAG-3'. Modulates transcriptional regulation via WNT3A. Inhibits Wnt signaling. Promotes degradation of activated CTNNB1. Plays a key role in the regulation of embryonic development. Required for normal looping of the embryonic heart tube. Required for normal development of the definitive gut endoderm. Probable transcriptional activator in the premeiotic germ cells. Isoform 2 (T-SOX17) shows no DNA-binding activity.
