

CCR1 Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP21344b

Product Information

Application WB, E Primary Accession P32246

Reactivity Human, Rat, Mouse

HostRabbitClonalitypolyclonalIsotypeRabbit IgGClone NamesRB52859Calculated MW41173

Additional Information

Gene ID 1230

Other Names C-C chemokine receptor type 1, C-C CKR-1, CC-CKR-1, CCR1, HM145,

LD78 receptor, Macrophage inflammatory protein 1-alpha receptor, MIP-1alpha-R, RANTES-R, CD191, CCR1, CMKBR1, CMKR1, SCYAR1

Target/Specificity This CCR1 antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 343-375 amino acids from the

C-terminal region of human CCR1.

Dilution WB~~1:1000 E~~Use at an assay dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions CCR1 Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

Protein Information

Name CCR1

Synonyms CMKBR1, CMKR1, SCYAR1

Function Chemokine receptor that plays a crucial role in regulating immune cell

migration, inflammation, and immune responses (PubMed: 14991608).

Contributes to the inflammatory response by recruiting immune cells, such as monocytes, macrophages, T-cells, and dendritic cells, to sites of inflammation for the clearance of pathogens and the resolution of tissue damage. When activated by its ligands including CCL3, CCL5-9, CCL13-16 and CCL23, triggers a signaling cascade within immune cells, leading to their migration towards the source of the chemokine (PubMed:15905581). For example, mediates neutrophil migration after activation by CCL3 leading to the sequential release of TNF-alpha and leukotriene B4 (By similarity). Also mediates monocyte migration upon CXCL4 binding (PubMed:29930254). Activation by CCL5 results in neuroinflammation through the ERK1/2 signaling pathway (By similarity).

Cellular Location Cell membrane; Multi-pass membrane protein

Tissue Location Widely expressed in different hematopoietic cells.

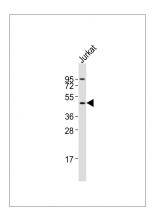

Background

Receptor for a C-C type chemokine. Binds to MIP-1-alpha, MIP-1-delta, RANTES, and MCP-3 and, less efficiently, to MIP-1- beta or MCP-1 and subsequently transduces a signal by increasing the intracellular calcium ions level. Responsible for affecting stem cell proliferation.
