

# ITGA3 Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP21353b

## **Product Information**

Application WB, E Primary Accession P26006

**Reactivity** Human, Mouse

HostRabbitClonalitypolyclonalIsotypeRabbit IgGClone NamesRB52675Calculated MW116612

# **Additional Information**

**Gene ID** 3675

Other Names Integrin alpha-3, CD49 antigen-like family member C, FRP-2, Galactoprotein

B3, GAPB3, VLA-3 subunit alpha, CD49c, Integrin alpha-3 heavy chain, Integrin

alpha-3 light chain, ITGA3, MSK18

Target/Specificity This ITGA3 antibody is generated from a rabbit immunized with a KLH

conjugated synthetic peptide between 875-909 amino acids from the

C-terminal region of human ITGA3.

**Dilution** WB~~1:2000 E~~Use at an assay dependent concentration.

**Format** Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

**Storage** Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions** ITGA3 Antibody (C-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

## **Protein Information**

Name ITGA3

Synonyms MSK18

**Function** Integrin alpha-3/beta-1 is a receptor for fibronectin, laminin, collagen,

epiligrin, thrombospondin and CSPG4. Integrin alpha- 3/beta-1 provides a

docking site for FAP (seprase) at invadopodia plasma membranes in a collagen-dependent manner and hence may participate in the adhesion, formation of invadopodia and matrix degradation processes, promoting cell invasion. Alpha-3/beta-1 may mediate with LGALS3 the stimulation by CSPG4 of endothelial cells migration.

#### **Cellular Location**

Cell membrane; Single-pass type I membrane protein. Cell membrane; Lipidanchor. Cell projection, invadopodium membrane; Single-pass type I membrane protein. Cell projection, filopodium membrane; Single-pass type I membrane protein. Note=Enriched preferentially at invadopodia, cell membrane protrusions that correspond to sites of cell invasion, in a collagen-dependent manner.

#### **Tissue Location**

Isoform 1 is widely expressed. Isoform 2 is expressed in brain and heart. In brain, both isoforms are exclusively expressed on vascular smooth muscle cells, whereas in heart isoform 1 is strongly expressed on vascular smooth muscle cells, isoform 2 is detected only on endothelial vein cells.

# **Background**

Integrin alpha-3/beta-1 is a receptor for fibronectin, laminin, collagen, epiligrin, thrombospondin and CSPG4. Integrin alpha-3/beta-1 provides a docking site for FAP (seprase) at invadopodia plasma membranes in a collagen-dependent manner and hence may participate in the adhesion, formation of invadopodia and matrix degradation processes, promoting cell invasion. Alpha- 3/beta-1 may mediate with LGALS3 the stimulation by CSPG4 of endothelial cells migration.
