

MYO3B Antibody

Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP51797

Product Information

Application	WB
Primary Accession	Q8WXR4
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	151829

Additional Information

Gene ID	140469
Other Names	Myosin-IIIb, MYO3B
Dilution	WB~~1:1000
Format	0.01M PBS, pH 7.2, 0.09% (W/V) Sodium azide, Glycerol 50%
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	MYO3B
Function	Probable actin-based motor with a protein kinase activity. Required for normal cochlear hair bundle development and hearing. Plays an important role in the early steps of cochlear hair bundle morphogenesis. Influences the number and lengths of stereocilia to be produced and limits the growth of microvilli within the forming auditory hair bundles thereby contributing to the architecture of the hair bundle, including its staircase pattern. Involved in the elongation of actin in stereocilia tips by transporting the actin regulatory factor ESPN to the plus ends of actin filaments.
Cellular Location	Cytoplasm, cytoskeleton. Cell projection, stereocilium {ECO:0000250 UniProtKB:Q1EG27}
Tissue Location	Expressed in retina, kidney and testis.

Background

Probable actin-based motor with a protein kinase activity.
