

# IL-5 Antibody

Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP51906

## Product Information

---

Application	WB
Primary Accession	<a href="#">P05113</a>
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	15238

## Additional Information

---

Gene ID	3567
Other Names	Interleukin-5, IL-5, B-cell differentiation factor I, Eosinophil differentiation factor, T-cell replacing factor, TRF, IL5
Target/Specificity	KLH-conjugated synthetic peptide encompassing a sequence within the center region of human IL-5. The exact sequence is proprietary.
Dilution	WB~~1:1000
Format	0.01M PBS, pH 7.2, 0.09% (W/V) Sodium azide, Glycerol 50%
Storage	Store at -20 °C.Stable for 12 months from date of receipt

## Protein Information

---

Name	IL5
Function	Homodimeric cytokine expressed predominantly by T-lymphocytes and NK cells that plays an important role in the survival, differentiation, and chemotaxis of eosinophils (PubMed: <a href="#">2653458</a> , PubMed: <a href="#">9010276</a> ). Also acts on activated and resting B-cells to induce immunoglobulin production, growth, and differentiation (By similarity). Mechanistically, exerts its biological effects through a receptor composed of IL5RA subunit and the cytokine receptor common subunit beta/CSF2RB (PubMed: <a href="#">1495999</a> , PubMed: <a href="#">22528658</a> ). Binding to the receptor leads to activation of various kinases including LYN, SYK and JAK2 and thereby propagates signals through the RAS-MAPK and JAK-STAT5 pathways respectively (PubMed: <a href="#">7613138</a> ).
Cellular Location	Secreted.
Tissue Location	Present in peripheral blood mononuclear cells.

## Background

---

Factor that induces terminal differentiation of late- developing B-cells to immunoglobulin secreting cells.
