

Inhibin beta A Antibody

Purified Rabbit Polyclonal Antibody (Pab)

Catalog # AP51977

Product Information

Application	WB
Primary Accession	P08476
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	47442

Additional Information

Gene ID	3624
Other Names	Inhibin beta A chain, Activin beta-A chain, Erythroid differentiation protein, EDF, INHBA
Target/Specificity	KLH conjugated synthetic peptide derived from human Inhibin beta A
Dilution	WB~~ 1:1000
Format	0.01M PBS, pH 7.2, 0.09% (W/V) Sodium azide, Glycerol 50%
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	INHBA
Function	Inhibins/activins are involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development or bone growth, depending on their subunit composition.
Cellular Location	Secreted.

Background

Inhibins and activins inhibit and activate, respectively, the secretion of follitropin by the pituitary gland. Inhibins/activins are involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development or bone growth,

depending on their subunit composition. Inhibins appear to oppose the functions of activins.
