

KLF4 Antibody

Purified Mouse Monoclonal Antibody (Mab) Catalog # AP52656

Product Information

Application WB
Primary Accession O43474
Reactivity Transfected
Host Mouse
Clonality Monoclonal
Isotype IgG2b
Calculated MW 54671

Additional Information

Gene ID 9314

Other Names Endothelial Kruppel like zinc finger protein; Epithelial zinc finger protein

EZF;EZF;GKLF;Gut-enriched krueppel-like

factor;KLF;KLF4;KLF4_HUMAN;Krueppel-like factor 4;Kruppel like factor 4 (Epithelial zinc finger protein EZF) (Gut enriched Krueppel like factor);Kruppel

like factor 4 (gut).

Dilution WB~~1:1000

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide, pH

7.3.

Storage Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

Protein Information

Name KLF4 (HGNC:6348)

Synonyms EZF, GKLF

Function Transcription factor; can act both as activator and as repressor. Binds the

5'-CACCC-3' core sequence. Binds to the promoter region of its own gene and

can activate its own transcription. Regulates the expression of key

transcription factors during embryonic development. Plays an important role in maintaining embryonic stem cells, and in preventing their differentiation. Required for establishing the barrier function of the skin and for postnatal

maturation and maintenance of the ocular surface. Involved in the

differentiation of epithelial cells and may also function in skeletal and kidney development. Contributes to the down-regulation of p53/TP53 transcription.

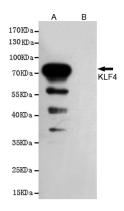

Background

Transcription factor; can act both as activator and as repressor. Binds the 5'-CACCC-3' core sequence. Binds to the promoter region of its own gene and can activate its own transcription. Regulates the expression of key transcription factors during embryonic development. Plays an important role in maintaining embryonic stem cells, and in preventing their differentiation. Required for establishing the barrier function of the skin and for postnatal maturation and maintenance of the ocular surface. Involved in the differentiation of epithelial cells and may also function in skeletal and kidney development. Contributes to the down-regulation of p53/TP53 transcription.
