

CHRDL1 Antibody

Purified Mouse Monoclonal Antibody (Mab) Catalog # AP52735

Product Information

Primary Accession

Host
Clonality
Isotype
Calculated MW

Q9BU40
Mouse
Monoclonal
IgG1
52026

Additional Information

Gene ID 91851

Other Names CHL; chordin like 1; Chordin-like protein

1;CHRDL1;CRDL1_HUMAN;dA141H5.1;neuralin 1; Neuralin-1;Neurogenesin-1;NRLN1;Ventroptin;VOPT.

Format Purified mouse monoclonal in buffer containing 0.1M Tris-Glycine (pH 7.4,

150 mM NaCl) with 0.09% (W/V) sodium azide, 50%, glycerol

Storage Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

Protein Information

Name CHRDL1

Synonyms NRLN1

Function Antagonizes the function of BMP4 by binding to it and preventing its

interaction with receptors. Alters the fate commitment of neural stem cells from gliogenesis to neurogenesis. Contributes to neuronal differentiation of neural stem cells in the brain by preventing the adoption of a glial fate. May

play a crucial role in dorsoventral axis formation. May play a role in

embryonic bone formation (By similarity). May also play an important role in regulating retinal angiogenesis through modulation of BMP4 actions in endothelial cells. Plays a role during anterior segment eye development.

Cellular Location Secreted.

Tissue Location Expressed in the developing cornea and in the eye anterior segment in

addition to the retina. Differentially expressed in the fetal brain. There is high

expression in cerebellum and neocortex Expressed in retinal pericytes.

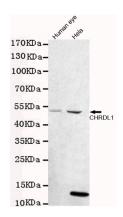

Background

Antagonizes the function of BMP4 by binding to it and preventing its interaction with receptors. Alters the fate commitment of neural stem cells from gliogenesis to neurogenesis. Contributes to neuronal differentiation of neural stem cells in the brain by preventing the adoption of a glial fate. May play a crucial role in dorsoventral axis formation. May play a role in embryonic bone formation (By similarity). May also play an important role in regulating retinal angiogenesis through modulation of BMP4 actions in endothelial cells. Plays a role during anterior segment eye development.
