

Anti-Apolipoprotein B Receptor Antibody

Catalog # AP53800

Product Information

Application	WB
Primary Accession	Q0VD83
Reactivity	Human, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	115634

Additional Information

Gene ID	55911
Other Names	APOB48R; Apolipoprotein B receptor; Apolipoprotein B-100 receptor; Apolipoprotein B-48 receptor; Apolipoprotein B48 receptor; apoB-48R
Target/Specificity	Recognizes endogenous levels of Apolipoprotein B Receptor protein.
Dilution	WB~~1/500 - 1/1000
Format	Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	APOBR (HGNC:24087)
Synonyms	APOB48R
Function	Macrophage receptor that binds to the apolipoprotein B48 (APOB) of dietary triglyceride (TG)-rich lipoproteins (TRL) or to a like domain of APOB in hypertriglyceridemic very low density lipoprotein (HTG-VLDL). Binds and internalizes TRL when out of the context of the macrophage. May provide essential lipids to reticuloendothelial cells. Could also be involved in foam cell formation with elevated TRL and remnant lipoprotein (RLP). Mediates the rapid high-affinity uptake of chylomicrons (CM), HTG-VLDL, and trypsinized (tryp) VLDL devoid of APOE in vitro in macrophages.
Cellular Location	Cell membrane; Peripheral membrane protein. Note=Binds monocyte-macrophage membrane. Thought to be anchored in the membrane through an interaction with an integral membrane protein
Tissue Location	Expressed in peripheral blood leukocytes > bone marrow = spleen > lymph

node, and only faintly visible in appendix and thymus. Expressed in the brain, heart, kidney, liver, lung, pancreas, and placenta. Expressed primarily by reticuloendothelial cells: monocytes, macrophages, and endothelial cells. Expressed in atherosclerotic lesion foam cells.

Background

Rabbit polyclonal antibody to Apolipoprotein B Receptor

Images

Western blot analysis of Apolipoprotein B Receptor expression in A549 (A), MCF7 (B), PC12 (C) whole cell lysates.
