

# Anti-Glycerol Kinase 1 Antibody

Catalog # AP53911

#### **Product Information**

Application WB
Primary Accession P32189
Other Accession Q14409

**Reactivity** Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 61245

#### **Additional Information**

**Gene ID** 2710

**Other Names** GK; Glycerol kinase; GK; Glycerokinase; ATP:glycerol 3-phosphotransferase;

GK3P; GKP3; GKTB; Putative glycerol kinase 3; GK 3; Glycerokinase 3; ATP:glycerol 3-phosphotransferase 3; Glycerol kinase, testis specific 1

**Target/Specificity** KLH-conjugated synthetic peptide encompassing a sequence within the

N-term region of human Glycerol Kinase 1. The exact sequence is proprietary.

**Dilution** WB~~1/500 - 1/1000

Format Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30%

glycerol, and 0.09% (W/V) sodium azide.

**Storage** Store at -20 °C.Stable for 12 months from date of receipt

#### **Protein Information**

Name GK ( HGNC:4289)

**Function** Kinase that plays a key role in glycerol metabolism, catalyzing its

phosphorylation to produce sn-glycerol 3-phosphate. Sn- glycerol

3-phosphate is a crucial intermediate in various metabolic pathways, such as the synthesis of glycerolipids and triglycerides, glycogenesis, glycolysis and

gluconeogenesis.

**Cellular Location** Mitochondrion outer membrane; Single-pass membrane protein. Nucleus.

Cytoplasm, cytosol. Note=Glycerol kinase activity is more cytosolic in some tissues. It probably represents the expression of isoforms lacking a transmembrane domain [Isoform 4]: Cytoplasm, cytosol. Note=In adult tissues, such as liver the glycerol kinase activity is more cytosolic. It probably represents the expression of this isoform which lacks a transmembrane

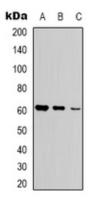

domain

[Isoform 2]: Widely expressed in fetal and adult tissues. [Isoform 4]: The sole isoform expressed in adult liver and kidney.

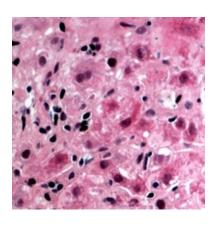

## **Background**

Rabbit polyclonal antibody to Glycerol Kinase 1

### **Images**

Western blot analysis of Glycerol Kinase 1 expression in Jurkat (A), HepG2 (B), HEK293T (C) whole cell lysates.

Immunohistochemical analysis of Glycerol Kinase 1 staining in human liver cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. AEC was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
