Rabbit polyclonal antibody to PEX19

Images

Western blot analysis of PEX19 expression in HEK293T (A), mouse brain (B), rat brain (C) whole cell lysates.

Immunohistochemical analysis of PEX19 staining in human lung cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
