Anti-Uroplakin 3a Antibody

Catalog # AP54140

Product Information

Application	IHC
Primary Accession	O75631
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	30670

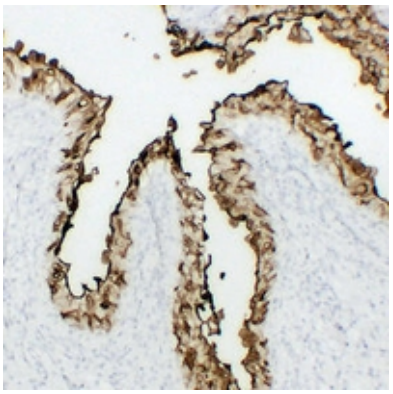

Additional Information

Gene ID	7380
Other Names	UPK3; Uroplakin-3a; UP3a; Uroplakin III; UPIII
Target/Specificity	KLH-conjugated synthetic peptide encompassing a sequence within human Uroplakin 3a. The exact sequence is proprietary.
Dilution	IHC~~1/100 - 1/300
Format	Mouse IgG1. Liquid in PBS containing 50% glycerol, 0.2% BSA and 0.01% sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	UPK3A
Synonyms	UPK3
Function	Component of the asymmetric unit membrane (AUM); a highly specialized biomembrane elaborated by terminally differentiated urothelial cells. May play an important role in AUM-cytoskeleton interaction in terminally differentiated urothelial cells. It also contributes to the formation of urothelial glycocalyx which may play an important role in preventing bacterial adherence (By similarity).
Cellular Location	Endoplasmic reticulum membrane; Single-pass type I membrane protein. Note=Heterodimer formation with UPK1B is a prerequisite to exit out of the endoplasmic reticulum (ER).
Tissue Location	Expressed in ureter..

Images

Immunohistochemical analysis of Uroplakin 3a staining in human bladder formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
