at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions GM2A Antibody (N-term) is for research use only and not for use in diagnostic

or therapeutic procedures.

Protein Information

Name GM2A (HGNC:4367)

Function The large binding pocket can accommodate several single chain

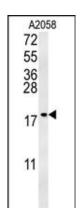

phospholipids and fatty acids, GM2A also exhibits some calcium- independent

phospholipase activity (By similarity). Binds gangliosides and stimulates ganglioside GM2 degradation. It stimulates only the breakdown of ganglioside GM2 and glycolipid GA2 by beta-hexosaminidase A. It extracts single GM2 molecules from membranes and presents them in soluble form to beta-hexosaminidase A for cleavage of N-acetyl-D- galactosamine and conversion to GM3 (By similarity). Has cholesterol transfer activity (PubMed: 17552909).

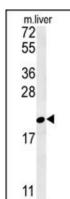

Cellular Location

Lysosome.
