

# Anti-PTEN (pS385) Antibody

Rabbit polyclonal antibody to PTEN (pS385) Catalog # AP61066

### **Product Information**

WB, IHC
<u>P60484</u>
<u>008586</u>
Human, Mouse, Rat, Monkey, Pig, Drosophila
Rabbit
Polyclonal
47166

## **Additional Information**

Gene ID	5728
Other Names	MMAC1; TEP1; Phosphatidylinositol 345-trisphosphate 3-phosphatase and dual-specificity protein phosphatase PTEN; Mutated in multiple advanced cancers 1; Phosphatase and tensin homolog
Target/Specificity	KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human PTEN. The exact sequence is proprietary.
Dilution	WB~~WB (1/500 - 1/1000), IHC (1/50 - 1/100) IHC~~WB (1/500 - 1/1000), IHC (1/50 - 1/100)
Format	Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

#### **Protein Information**

Name	PTEN
Synonyms	MMAC1, TEP1
Function	Dual-specificity protein phosphatase, dephosphorylating tyrosine-, serine- and threonine-phosphorylated proteins (PubMed: <u>9187108</u> , PubMed: <u>9256433</u> , PubMed: <u>9616126</u> ). Also functions as a lipid phosphatase, removing the phosphate in the D3 position of the inositol ring of PtdIns(3,4,5)P3/phosphatidylinositol 3,4,5- trisphosphate, PtdIns(3,4)P2/phosphatidylinositol 3,4-diphosphate and PtdIns3P/phosphatidylinositol 3-phosphate with a preference for PtdIns(3,4,5)P3 (PubMed: <u>16824732</u> , PubMed: <u>26504226</u> , PubMed: <u>9593664</u> , PubMed: <u>9811831</u> ). Furthermore, this enzyme can also act as a cytosolic

	inositol 3-phosphatase acting on Ins(1,3,4,5,6)P5/inositol 1,3,4,5,6 pentakisphosphate and possibly Ins(1,3,4,5)P4/1D-myo-inositol 1,3,4,5- tetrakisphosphate (PubMed: <u>11418101</u> , PubMed: <u>15979280</u> ). Antagonizes the PI3K-AKT/PKB signaling pathway by dephosphorylating phosphoinositides and thereby modulating cell cycle progression and cell survival (PubMed: <u>31492966</u> , PubMed: <u>37279284</u> ). The unphosphorylated form cooperates with MAGI2 to suppress AKT1 activation (PubMed: <u>11707428</u> ). In motile cells, suppresses the formation of lateral pseudopods and thereby promotes cell polarization and directed movement (PubMed: <u>22279049</u> ). Dephosphorylates tyrosine-phosphorylated focal adhesion kinase and inhibits cell migration and integrin-mediated cell spreading and focal adhesion formation (PubMed: <u>22279049</u> ). Required for growth factor-induced epithelial cell migration; growth factor stimulation induces PTEN phosphorylation which changes its binding preference from the p85 regulatory subunit of the P13K kinase complex to DLC1 and results in translocation of the PTEN-DLC1 complex to the posterior of migrating cells to promote RHOA activation (PubMed: <u>26166433</u> ). Meanwhile, TNS3 switches binding preference from DLC1 to p85 and the TNS3-p85 complex translocates to the leading edge of migrating cells to activate RAC1 activation (PubMed: <u>26166433</u> ). Plays a role as a key modulator of the AKT-mTOR signaling pathway controlling the tempo of the process of newborn neurons integration during adult neurogenesis, including correct neuron positioning, dendritic development and synapse formation (By similarity). Involved in the regulation of synaptic function in excitatory hippocampal synapses. Recruited to the postsynaptic membrane upon NMDA receptor-dependent long-term depression (LTD) (By similarity). May be a negative regulator of insulin signaling and glucose metabolism in adipose tissue. The nuclear monoubiquitinated form possesses greater apoptotic potential, whereas the cytoplasmic nonubiquitinated form induces less tumor suppr
Cellular Location	Cytoplasm. Nucleus. Nucleus, PML body. Cell projection, dendritic spine {ECO:0000250 UniProtKB:O54857}. Postsynaptic density {ECO:0000250 UniProtKB:O54857}. Note=Monoubiquitinated form is nuclear Nonubiquitinated form is cytoplasmic. Colocalized with PML and USP7 in PML nuclear bodies (PubMed:18716620). XIAP/BIRC4 promotes its nuclear localization (PubMed:19473982). Associares with the postsynaptic density in response to NMDAR activation (By similarity) {ECO:0000250 UniProtKB:O54857, ECO:0000269 PubMed:18716620, ECO:0000269 PubMed:19473982}
Tissue Location	Expressed at a relatively high level in all adult tissues, including heart, brain, placenta, lung, liver, muscle, kidney and pancreas.

## Background

KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human PTEN. The exact sequence is proprietary.

#### Images

Western blot analysis of PTEN (pS385) expression in A549 (A), THP1 (B), mouse spleen (C), Raw264.7 (D) whole cell lysates.

Immunohistochemical analysis of PTEN (pS385) staining in human lung cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
