Anti-Kappa Opioid Receptor Antibody

Catalog # AP61232

Product Information

Application	WB
Primary Accession	P41145
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	42645

Additional Information

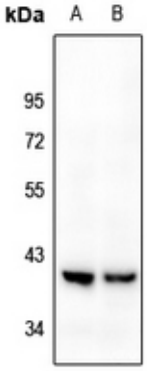

Gene ID	4986
Other Names	OPRK; Kappa-type opioid receptor; K-OR-1; KOR-1
Target/Specificity	KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human Kappa Opioid Receptor. The exact sequence is proprietary.
Dilution	WB~~WB (1/500 - 1/1000)
Format	Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

Protein Information

Name	OPRK1
Synonyms	OPRK
Function	G protein-coupled opioid receptor that functions as a receptor for endogenous alpha-neoendorphins and dynorphins, but has low affinity for beta-endorphins. Also functions as a receptor for various synthetic opioids and for the psychoactive diterpene salvinorin A. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream effectors, such as adenylate cyclase. Signaling leads to the inhibition of adenylate cyclase activity. Inhibits neurotransmitter release by reducing calcium ion currents and increasing potassium ion conductance. Plays a role in the perception of pain. Plays a role in mediating reduced physical activity upon treatment with synthetic opioids. Plays a role in the regulation of salivation in response to synthetic opioids. May play a role in arousal and regulation of autonomic and neuroendocrine functions.

Cellular Location	Cell membrane; Multi-pass membrane protein
Tissue Location	Detected in brain and placenta.

Images

Western blot analysis of Kappa Opioid Receptor expression in C6 (A), Hela (B) whole cell lysates. (Predicted band size: 42 kD; Observed band size: 42 kD)
