

# Anti-CD21 Antibody

Mouse monoclonal antibody to CD21

Catalog # AP61605

## Product Information

---

Application	IHC
Primary Accession	<a href="#">P20023</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	112916

## Additional Information

---

Gene ID	1380
Other Names	C3DR; Complement receptor type 2; Cr2; Complement C3d receptor; Epstein-Barr virus receptor; EBV receptor; CD21
Target/Specificity	Recognizes endogenous levels of CD21 protein.
Dilution	IHC~~1:100~500
Format	Mouse IgG1. Liquid in PBS containing 50% glycerol, 0.2% BSA and 0.09% (W/V) sodium azide.
Storage	Store at -20 °C.Stable for 12 months from date of receipt

## Protein Information

---

Name	CR2
Synonyms	C3DR
Function	<p>Serves as a receptor for various ligands including complement component CD3d, HNRNPU OR IFNA1 (PubMed:<a href="#">1849076</a>, PubMed:<a href="#">21527715</a>, PubMed:<a href="#">7753047</a>). When C3d is bound to antigens, attaches to C3d on B- cell surface and thereby facilitates the recognition and uptake of antigens by B-cells (PubMed:<a href="#">21527715</a>). This interaction enhances B-cell activation and subsequent immune responses. Forms a complex with several partners on the surface of B-cells including CD19, FCRL5 and CD81, to form the B-cell coreceptor complex that plays a crucial role in B-cell activation and signaling (PubMed:<a href="#">1383329</a>, PubMed:<a href="#">30107486</a>). Also induces specific intracellular signaling separately from the BCR and CD19 by activating the tyrosine kinase SRC, which then phosphorylates nucleolin/NCL and triggers AKT and GSK3 kinase activities in a SYK/CD19-independent manner (PubMed:<a href="#">12938232</a>). Acts as a ligand for CD23 (FcepsilonRII), a low-affinity receptor for IgE, which is</p>

expressed on B-cells and other immune cells, and thus participates in the regulation of IgE production (PubMed:[1386409](#)).

**Cellular Location**

Cell membrane; Single-pass type I membrane protein

**Tissue Location**

Mature B-lymphocytes, T-lymphocytes, pharyngeal epithelial cells, astrocytes and follicular dendritic cells of the spleen

## **Background**

---

KLH-conjugated synthetic peptide encompassing a sequence within human CD21. The exact sequence is proprietary.
