

Vimentin Monoclonal Antibody(1A7)

Catalog # AP63381

Product Information

Application WB Primary Accession P08670

Reactivity Human, Mouse, Rat

Host Mouse
Clonality Monoclonal
Calculated MW 53652

Additional Information

Gene ID 7431

Other Names VIM; Vimentin

Dilution WB~~WB: 1:1000-3000

Format PBS, pH 7.4, containing 0.09% (W/V) sodium azide as Preservative and 50%

Glycerol.

Storage Conditions -20°C

Protein Information

Name VIM (<u>HGNC:12692</u>)

Function Vimentins are class-III intermediate filaments found in various

non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Plays a role in cell directional movement, orientation, cell sheet organization and Golgi complex polarization at the cell migration front (By similarity). Protects SCRIB from proteasomal degradation and facilitates its localization to intermediate filaments in a cell contact-mediated manner (By

similarity).

Cellular Location Cytoplasm. Cytoplasm, cytoskeleton. Nucleus matrix

{ECO:0000250|UniProtKB:P31000}. Cell membrane

{ECO:0000250 | UniProtKB:P20152}

Tissue Location Highly expressed in fibroblasts, some expression in T- and B-lymphocytes,

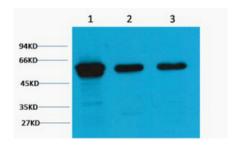

and little or no expression in Burkitt's lymphoma cell lines. Expressed in many

hormone-independent mammary carcinoma cell lines.

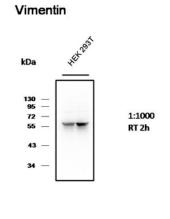

Background

Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally.

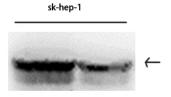

Images

Western blot analysis of 1) Hela, 2) Mouse Brain Tissue, 3) Rat Brain tissue, diluted at 1:2000.

Western blot analysis of 293T cell with Mouse mAb diluted at 1:1000
