#### **Protein Information**

Name ATF1

**Function** This protein binds the cAMP response element (CRE) (consensus:

5'-GTGACGT[AC][AG]-3'), a sequence present in many viral and cellular promoters. Binds to the Tax-responsive element (TRE) of HTLV-I. Mediates PKA-induced stimulation of CRE-reporter genes. Represses the expression of FTH1 and other antioxidant detoxification genes. Triggers cell proliferation

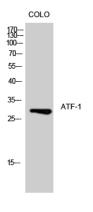

and transformation.

Cellular Location Nucleus.
