

GNPAT Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP6909b

Product Information

Application WB, IHC-P, FC, E

Primary Accession 015228 Reactivity Human Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB21213 **Calculated MW** 77188 **Antigen Region** 654-680

Additional Information

Gene ID 8443

Other Names Dihydroxyacetone phosphate acyltransferase, DAP-AT, DHAP-AT,

A cyl-CoA: dihydroxy acetone phosphate a cyltrans fer ase, Glycerone-phosphate

O-acyltransferase, GNPAT, DAPAT, DHAPAT

Target/Specificity This GNPAT antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 654-680 amino acids from the

C-terminal region of human GNPAT.

Dilution WB~~1:1000 IHC-P~~1:100~500 FC~~1:10~50 E~~Use at an assay dependent

concentration.

Format Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide.

This antibody is purified through a protein A column, followed by peptide

affinity purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions GNPAT Antibody (C-term) is for research use only and not for use in

diagnostic or therapeutic procedures.

Protein Information

Name GNPAT (HGNC:4416)

Function Dihydroxyacetonephosphate acyltransferase catalyzing the first step in the

biosynthesis of plasmalogens, a subset of phospholipids that differ from

other glycerolipids by having an alkyl chain attached through a vinyl ether linkage at the sn-1 position of the glycerol backbone, and which unique physical properties have an impact on various aspects of cell signaling and membrane biology.

Cellular Location

Peroxisome membrane; Peripheral membrane protein {ECO:0000250 | UniProtKB:Q9ES71}; Matrix side {ECO:0000250 | UniProtKB:Q9ES71}. Note=Exclusively localized to the lumenal side of the peroxisomal membrane {ECO:0000250 | UniProtKB:Q9ES71}

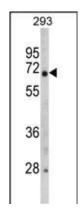

Background

GNPAT is an enzyme located in the peroxisomal membrane which is essential to the synthesis of ether phospholipids.

Images

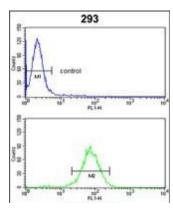

Western blot analysis of GNPAT Antibody (C-term) (Cat. #AP6909b) in 293 cell line lysates (35ug/lane). GNPAT (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human brain tissue reacted with GNPAT Antibody (C-term), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

GNPAT Antibody (C-term) (Cat. #AP6909b) flow cytometric analysis of 293 cells (bottom histogram) compared to a negative control cell (top histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.
