

Ezrin Polyclonal Antibody

Catalog # AP69834

Product Information

Application WB, IHC-P P15311 **Primary Accession**

Reactivity Human, Mouse, Rat

Host Rabbit Clonality Polyclonal Calculated MW 69413

Additional Information

Gene ID 7430

Other Names EZR; VIL2; Ezrin; Cytovillin; Villin-2; p81

Dilution WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300.

ELISA: 1/10000. Not yet tested in other applications. IHC-P~~N/A

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

Storage Conditions -20°C

Protein Information

EZR Name

VIL2 **Synonyms**

Function Probably involved in connections of major cytoskeletal structures to the

> plasma membrane. In epithelial cells, required for the formation of microvilli and membrane ruffles on the apical pole. Along with PLEKHG6, required for

normal macropinocytosis.

Cellular Location Apical cell membrane; Peripheral membrane protein; Cytoplasmic side. Cell

> projection. Cell projection, microvillus membrane; Peripheral membrane protein; Cytoplasmic side. Cell projection, ruffle membrane; Peripheral membrane protein; Cytoplasmic side. Cytoplasm, cell cortex. Cytoplasm, cytoskeleton. Cell projection, microvillus {ECO:0000250 | UniProtKB:P26040}. Note=Localization to the apical membrane of parietal cells depends on the interaction with PALS1 Localizes to cell extensions and peripheral processes

of astrocytes (By similarity). Microvillar peripheral membrane protein

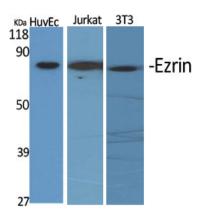

(cytoplasmic side). {ECO:0000250 | UniProtKB:P31977}

Tissue Location Expressed in cerebral cortex, basal ganglia, hippocampus, hypophysis, and optic nerve. Weakly expressed in brain stem and diencephalon. Stronger expression was detected in gray matter of frontal lobe compared to white matter (at protein level). Component of the microvilli of intestinal epithelial cells. Preferentially expressed in astrocytes of hippocampus, frontal cortex, thalamus, parahippocampal cortex, amygdala, insula, and corpus callosum. Not detected in neurons in most tissues studied

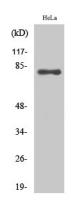

Background

Probably involved in connections of major cytoskeletal structures to the plasma membrane. In epithelial cells, required for the formation of microvilli and membrane ruffles on the apical pole. Along with PLEKHG6, required for normal macropinocytosis.
