

IL-8 Polyclonal Antibody

Catalog # AP70526

Product Information

Application WB. IHC-P P10145 **Primary Accession** Reactivity Human Host Rabbit Clonality **Polyclonal** Calculated MW 11098

Additional Information

Gene ID 3576

Other Names IL8; CXCL8; Interleukin-8; IL-8; C-X-C motif chemokine 8; Emoctakin;

> Granulocyte chemotactic protein 1; GCP-1; Monocyte-derived neutrophil chemotactic factor; MDNCF; Monocyte-derived neutrophil-activating peptide;

MONAP; Neutrophil-activati

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Dilution

ELISA: 1/20000. Not yet tested in other applications. IHC-P~~N/A

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

-20°C **Storage Conditions**

Protein Information

Name CXCL8

Synonyms IL8

Function Chemotactic factor that mediates inflammatory response by attracting

> neutrophils, basophils, and T-cells to clear pathogens and protect the host from infection (PubMed: 18692776, PubMed: 7636208). Also plays an

important role in neutrophil activation (PubMed:2145175, PubMed:9623510). Released in response to an inflammatory stimulus, exerts its effect by binding to the G-protein-coupled receptors CXCR1 and CXCR2, primarily found in

neutrophils, monocytes and endothelial cells (PubMed: 1840701,

PubMed: 1891716). G-protein heterotrimer (alpha, beta, gamma subunits) constitutively binds to CXCR1/CXCR2 receptor and activation by IL8 leads to beta and gamma subunits release from Galpha (GNAI2 in neutrophils) and activation of several downstream signaling pathways including PI3K and

MAPK pathways (PubMed: 11971003, PubMed: 8662698).

Background

IL-8 is a chemotactic factor that attracts neutrophils, basophils, and T-cells, but not monocytes. It is also involved in neutrophil activation. It is released from several cell types in response to an inflammatory stimulus. IL-8(6-77) has a 5-10-fold higher activity on neutrophil activation, IL-8(5-77) has increased activity on neutrophil activation and IL-8(7-77) has a higher affinity to receptors CXCR1 and CXCR2 as compared to IL-8(1-77), respectively.
