

# Ethanolamine Kinase (EKI1) Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP7068A

## **Product Information**

Application	WB, E
Primary Accession	<u>Q9HBU6</u>
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Clone Names	RB5289
Calculated MW	50968
Antigen Region	1-30

#### **Additional Information**

Gene ID	55500
Other Names	Ethanolamine kinase 1, EKI 1, ETNK1, EKI1
Target/Specificity	This Ethanolamine Kinase (EKI1) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human Ethanolamine Kinase (EKI1).
Dilution	WB~~1:1000 E~~Use at an assay dependent concentration.
Format	Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Precautions	Ethanolamine Kinase (EKI1) Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

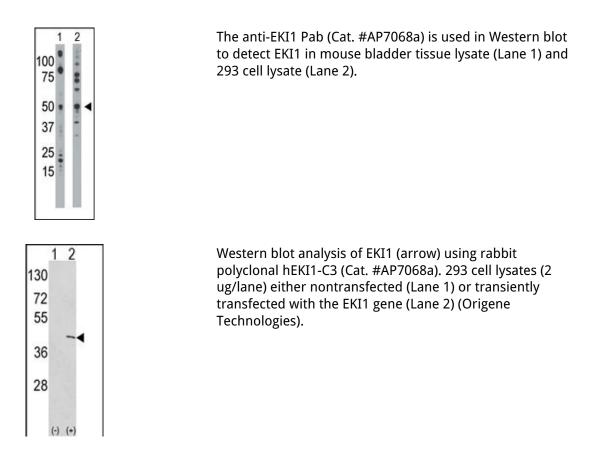

#### **Protein Information**

Name	ETNK1 ( <u>HGNC:24649</u> )
Function	Highly specific for ethanolamine phosphorylation. May be a rate-controlling step in phosphatidylethanolamine biosynthesis.
Cellular Location	Cytoplasm.

### Background

Ethanolamine kinase 1 (EKI1), functions in the first committed step of the phosphatidylethanolamine synthesis pathway. This cytosolic enzyme is specific for ethanolamine and exhibits negligible kinase activity on choline.
