

Melan-A Polyclonal Antibody

Catalog # AP70911

Product Information

Application WB, IHC-P
Primary Accession Q16655
Reactivity Human
Host Rabbit
Clonality Polyclonal
Calculated MW 13157

Additional Information

Gene ID 2315

Other Names MLANA; MART1; Melanoma antigen recognized by T-cells 1; MART-1; Antigen

LB39-AA; Antigen SK29-AA; Protein Melan-A

Dilution WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300.

ELISA: 1/40000. Not yet tested in other applications. IHC-P~~N/A

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

Storage Conditions -20°C

Protein Information

Name MLANA

Synonyms MART1

Function Involved in melanosome biogenesis by ensuring the stability of GPR143.

Plays a vital role in the expression, stability, trafficking, and processing of melanocyte protein PMEL, which is critical to the formation of stage II

melanosomes.

Cellular Location Endoplasmic reticulum membrane; Single-pass type III membrane protein.

Golgi apparatus. Golgi apparatus, trans-Golgi network membrane.

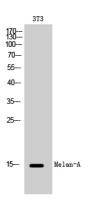

Melanosome. Note=Also found in small vesicles and tubules dispersed over the entire cytoplasm. A small fraction of the protein is inserted into the membrane in an inverted orientation Inversion of membrane topology results in the relocalization of the protein from a predominant Golgi/post-Golgi area to the endoplasmic reticulum. Melanoma cells expressing the protein with an inverted membrane topology are more effectively recognized by specific cytolytic T-lymphocytes than those expressing the protein in its native

membrane orientation

Background

Involved in melanosome biogenesis by ensuring the stability of GPR143. Plays a vital role in the expression, stability, trafficking, and processing of melanocyte protein PMEL, which is critical to the formation of stage II melanosomes.
