

# **EpoR Polyclonal Antibody**

Catalog # AP73199

### **Product Information**

Application WB
Primary Accession P19235

Reactivity Human, Mouse, Rat

HostRabbitClonalityPolyclonalCalculated MW55065

#### **Additional Information**

**Gene ID** 2057

Other Names EPOR; Erythropoietin receptor; EPO-R

**Dilution** WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other

applications.

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

Storage Conditions -20°C

#### **Protein Information**

Name EPOR {ECO:0000303 | PubMed:2163695, ECO:0000312 | HGNC:HGNC:3416}

**Function** Receptor for erythropoietin, which mediates erythropoietin- induced

erythroblast proliferation and differentiation (PubMed: 10388848,

PubMed:<u>2163695</u>, PubMed:<u>2163696</u>, PubMed:<u>8662939</u>, PubMed:<u>9774108</u>). Upon EPO stimulation, EPOR dimerizes triggering the JAK2/STAT5 signaling cascade (By similarity). In some cell types, can also activate STAT1 and STAT3 (PubMed:<u>11756159</u>). May also activate the LYN tyrosine kinase (By similarity).

Cellular Location Cell membrane {ECO:0000250 | UniProtKB:P14753}; Single-pass type I

membrane protein

**Tissue Location** Erythroid cells and erythroid progenitor cells. [Isoform EPOR-S]: Isoform

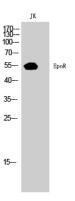

EPOR-S and isoform EPOR-T are the predominant forms in bone marrow.

## **Background**

Receptor for erythropoietin. Mediates erythropoietin- induced erythroblast proliferation and differentiation. Upon EPO stimulation, EPOR dimerizes triggering the JAK2/STAT5 signaling cascade. In some

cell types, can also activate STAT1 and STAT3. May also activate the LYN tyrosine kinase.

## **Images**

Western Blot analysis of JK cells using EpoR Polyclonal Antibody. Secondary antibody was diluted at 1:20000
