

Beclin-1 Polyclonal Antibody

Catalog # AP73946

Product Information

Application WB Primary Accession Q14457

Reactivity Human, Mouse

HostRabbitClonalityPolyclonalCalculated MW51896

Additional Information

Gene ID 8678

Other Names beclin 1, autophagy related

Dilution WB~~WB 1:500-2000, ELISA 1:10000-20000

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium

azide.

Storage Conditions -20°C

Protein Information

Name BECN1

Synonyms GT197

Function Plays a central role in autophagy (PubMed: <u>18570871</u>, PubMed:<u>21358617</u>,

PubMed:23184933, PubMed:23974797, PubMed:25484083,

PubMed:<u>28445460</u>, PubMed:<u>37776275</u>). Acts as a core subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis. Involved in regulation of degradative endocytic trafficking and required for the abscission step in cytokinesis, probably in the context of PI3KC3-C2

(PubMed: <u>20208530</u>, PubMed: <u>20643123</u>, PubMed: <u>23974797</u>,

PubMed:<u>26783301</u>). Essential for the formation of PI3KC3-C2 but not PI3KC3-C1 PI3K complex forms. Involved in endocytosis (PubMed:<u>25275521</u>).

May play a role in antiviral host defense.

Cellular Location Cytoplasm. Golgi apparatus, trans-Golgi network membrane; Peripheral

membrane protein. Endosome membrane; Peripheral membrane protein.

Endoplasmic reticulum membrane; Peripheral membrane protein.

Mitochondrion membrane; Peripheral membrane protein. Endosome {ECO:0000250 | UniProtKB:O88597} Cytoplasmic vesicle, autophagosome. Note=Interaction with ATG14 promotes translocation to autophagosomes. Expressed in dendrites and cell bodies of cerebellar Purkinje cells (By similarity) {ECO:0000250 | UniProtKB:O88597, ECO:0000269 | PubMed:19050071} [Beclin-1-C 37 kDa]: Mitochondrion {ECO:0000250 | UniProtKB:O88597}

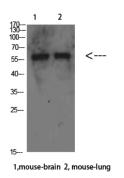

Tissue Location

Ubiquitous.

Background

Plays a central role in autophagy (PubMed: 23184933, PubMed:28445460). Acts as core subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis. Involved in regulation of degradative endocytic trafficking and required for the abcission step in cytokinesis, probably in the context of PI3KC3-C2 (PubMed:20643123, PubMed:20208530, PubMed:26783301). Essential for the formation of PI3KC3-C2 but not PI3KC3-C1 PI3K complex forms. Involved in endocytosis (PubMed:25275521). Protects against infection by a neurovirulent strain of Sindbis virus (PubMed:9765397). May play a role in antiviral host defense.
