

PENK Polyclonal Antibody

Catalog # AP74012

Product Information

Application	WB
Primary Accession	P01210
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	30787

Additional Information

Gene ID	5179
Other Names	PENK
Dilution	WB--WB 1:500-2000, ELISA 1:10000-20000
Format	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.
Storage Conditions	-20°C

Protein Information

Name	PENK (HGNC:8831)
Function	[Met-enkephalin]: Neuropeptide that competes with and mimic the effects of opiate drugs. They play a role in a number of physiologic functions, including pain perception and responses to stress.
Cellular Location	Cytoplasmic vesicle, secretory vesicle, chromaffin granule lumen {ECO:0000250 UniProtKB:P01211}. Secreted {ECO:0000250 UniProtKB:P01211}

Background

Met- and Leu-enkephalins compete with and mimic the effects of opiate drugs. They play a role in a number of physiologic functions, including pain perception and responses to stress. PENK(114-133) and PENK(237-258) increase glutamate release in the striatum. PENK(114-133) decreases GABA concentration in the striatum.
