Protein Information

Name **FSHB**

Function Together with the alpha chain CGA constitutes follitropin, the

> follicle-stimulating hormone, and provides its biological specificity to the hormone heterodimer. Binds FSHR, a G protein-coupled receptor, on target cells to activate downstream signaling pathways (PubMed: 24692546, PubMed: 2494176). Follitropin is involved in follicle development and

> spermatogenesis in reproductive organs (PubMed: 407105, PubMed: 8220432).

Cellular Location Secreted. Note=Efficient secretion requires dimerization with CGA
