

FGF2 Rabbit mAb

Catalog # AP74819

Product Information

ApplicationWBPrimary AccessionP09038ReactivityHumanHostRabbit

Clonality Monoclonal Antibody

Calculated MW 30770

Additional Information

Gene ID 2247

Other Names FGF2

Dilution WB~~1/500-1/1000

Format Liquid

Protein Information

Name FGF2

Synonyms FGFB

Function Acts as a ligand for FGFR1, FGFR2, FGFR3 and FGFR4 (PubMed: 8663044). Also

acts as an integrin ligand which is required for FGF2 signaling

(PubMed: 28302677). Binds to integrin ITGAV:ITGB3 (PubMed: 28302677). Plays

an important role in the regulation of cell survival, cell division, cell differentiation and cell migration (PubMed:<u>28302677</u>, PubMed:<u>8663044</u>). Functions as a potent mitogen in vitro (PubMed:<u>1721615</u>, PubMed:<u>3732516</u>,

PubMed:<u>3964259</u>). Can induce angiogenesis (PubMed:<u>23469107</u>, PubMed:<u>28302677</u>). Mediates phosphorylation of ERK1/2 and thereby promotes retinal lens fiber differentiation (PubMed:<u>29501879</u>).

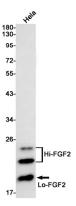

Cellular Location Secreted. Nucleus. Note=Exported from cells by an endoplasmic reticulum

(ER)/Golgi-independent mechanism. Unconventional secretion of FGF2 occurs by direct translocation across the plasma membrane (PubMed:20230531). Binding of exogenous FGF2 to FGFR facilitates endocytosis followed by translocation of FGF2 across endosomal membrane into the cytosol (PubMed:22321063). Nuclear import from the cytosol requires the classical nuclear import machinery, involving proteins KPNA1 and KPNB1, as well as

CEP57 (PubMed:22321063)

Tissue Location Expressed in granulosa and cumulus cells. Expressed in hepatocellular
