

Thrombomodulin Rabbit mAb

Catalog # AP74839

Product Information

Application	WB, IP, ICC
Primary Accession	P07204
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	60329

Additional Information

Gene ID	7056
Other Names	THBD
Dilution	WB~~1/500-1/1000 IP~~N/A ICC~~N/A
Format	Liquid

Protein Information

Name	THBD
Synonyms	THRM
Function	<p>Endothelial cell receptor that plays a critical role in regulating several physiological processes including hemostasis, coagulation, fibrinolysis, inflammation, and angiogenesis (PubMed:10761923). Acts as a cofactor for thrombin activation of protein C/PROC on the surface of vascular endothelial cells leading to initiation of the activated protein C anticoagulant pathway (PubMed:29323190, PubMed:33836597, PubMed:9395524). Also accelerates the activation of the plasma carboxypeptidase B2/CPB2, which catalyzes removal of C-terminal basic amino acids from its substrates including kinins or anaphylatoxins leading to fibrinolysis inhibition (PubMed:26663133). Plays critical protective roles in changing the cleavage specificity of protease-activated receptor 1/PAR1, inhibiting endothelial cell permeability and inflammation (By similarity). Suppresses inflammation distinctly from its anticoagulant cofactor activity by sequestering HMGB1 thereby preventing it from engaging cellular receptors such as RAGE and contributing to the inflammatory response (PubMed:15841214).</p>
Cellular Location	Membrane; Single-pass type I membrane protein.
Tissue Location	Endothelial cells are unique in synthesizing thrombomodulin
