

# Glutamine Synthetase Rabbit mAb

Catalog # AP74913

#### **Product Information**

ApplicationWBPrimary AccessionP15104ReactivityMouse, RatHostRabbit

**Clonality** Monoclonal Antibody

Calculated MW 42064

### **Additional Information**

**Gene ID** 2752

Other Names GLUL

**Dilution** WB~~1/500-1/1000

Format 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA.

**Storage** Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

# **Protein Information**

Name GLUL {ECO:0000303 | PubMed:30158707, ECO:0000312 | HGNC:HGNC:4341}

**Function** Glutamine synthetase that catalyzes the ATP-dependent conversion of

glutamate and ammonia to glutamine (PubMed: 16267323, PubMed: 30158707, PubMed: 36289327). Its role depends on tissue

localization: in the brain, it regulates the levels of toxic ammonia and converts neurotoxic glutamate to harmless glutamine, whereas in the liver, it is one of the enzymes responsible for the removal of ammonia (By similarity). Plays a key role in ammonium detoxification during erythropoiesis: the glutamine synthetase activity is required to remove ammonium generated by

porphobilinogen deaminase (HMBS) during heme biosynthesis to prevent ammonium accumulation and oxidative stress (By similarity). Essential for proliferation of fetal skin fibroblasts (PubMed:<u>18662667</u>). Independently of its glutamine synthetase activity, required for endothelial cell migration during vascular development: acts by regulating membrane localization and activation of the GTPase RHOJ, possibly by promoting RHOJ palmitoylation (PubMed:<u>30158707</u>). May act as a palmitoyltransferase for RHOJ: able to autopalmitoylate and then transfer the palmitoyl group to RHOJ

(PubMed:30158707). Plays a role in ribosomal 40S subunit biogenesis (PubMed:26711351). Through the interaction with BEST2, inhibits BEST2

channel activity by affecting the gating at the aperture in the absence of intracellular L-glutamate, but sensitizes BEST2 to intracellular L-glutamate, which promotes the opening of BEST2 and thus relieves its inhibitory effect on BEST2 (PubMed: 36289327).

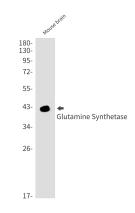

**Cellular Location** 

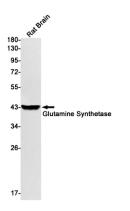

Cytoplasm, cytosol. Microsome {ECO:0000250|UniProtKB:P09606} Mitochondrion {ECO:0000250|UniProtKB:P09606}. Cell membrane; Lipid-anchor. Note=Mainly localizes in the cytosol, with a fraction associated

with the cell membrane

**Tissue Location** Expressed in endothelial cells.
