

ASH2L Rabbit mAb

Catalog # AP75110

Product Information

Application WB, IHC-P, IHC-F, ICC

Primary Accession Q9UBL3

Reactivity Human, Mouse, Rat

Host Rabbit

Clonality Monoclonal Antibody

Calculated MW 68723

Additional Information

Gene ID 9070

Other Names ASH2L

Dilution WB~~1/500-1/1000 IHC-P~~N/A IHC-F~~N/A ICC~~N/A

Format 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA.

Storage Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

Protein Information

Name ASH2L

Synonyms ASH2L1

Function Transcriptional regulator (PubMed: <u>12670868</u>). Component or associated

component of some histone methyltransferase complexes which regulates transcription through recruitment of those complexes to gene promoters (PubMed:<u>19131338</u>). Component of the Set1/Ash2 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3,

but not if the neighboring 'Lys-9' residue is already methylated

(PubMed: 19556245). As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3 (PubMed: 19556245). May play a role in hematopoiesis (PubMed: 12670868). In association with RBBP5 and WDR5, stimulates the histone methyltransferase activities of KMT2A, KMT2B, KMT2C, KMT2D, SETD1A and SETD1B (PubMed: 21220120,

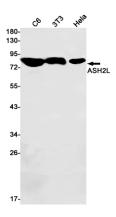

PubMed:<u>22266653</u>).

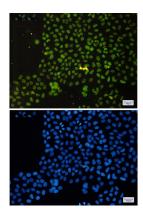

Cellular Location Nucleus.

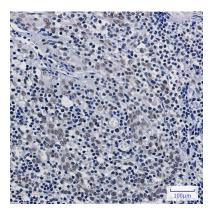

Tissue Location Ubiquitously expressed. Predominantly expressed in adult heart and testis

and fetal lung and liver, with barely detectable expression in adult lung, liver, kidney, prostate, and peripheral leukocytes.
