

Homer1 Rabbit mAb

Catalog # AP75566

Product Information

ApplicationWB, IPPrimary AccessionQ86YM7ReactivityMouse, RatHostRabbit

Clonality Monoclonal Antibody

Calculated MW 40277

Additional Information

Gene ID 9456

Other Names HOMER1

Dilution WB~~1/500-1/1000 IP~~1/20

Format 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA.

Storage Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

Protein Information

Name HOMER1 (HGNC:17512)

Function Postsynaptic density scaffolding protein. Binds and cross- links cytoplasmic

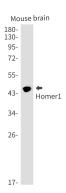

regions of GRM1, GRM5, ITPR1, DNM3, RYR1, RYR2, SHANK1 and SHANK3. By physically linking GRM1 and GRM5 with ER- associated ITPR1 receptors, it aids the coupling of surface receptors to intracellular calcium release. May also couple GRM1 to PI3 kinase through its interaction with AGAP2. Isoform 1 regulates the trafficking and surface expression of GRM5. Isoform 3 acts as a natural dominant negative, in dynamic competition with constitutively expressed isoform 1 to regulate synaptic metabotropic glutamate function. Isoform 3, may be involved in the structural changes that occur at synapses during long-lasting neuronal plasticity and development. Forms a high-order complex with SHANK1, which in turn is necessary for the structural and functional integrity of dendritic spines (By similarity). Negatively regulates T cell activation by inhibiting the calcineurin-NFAT pathway. Acts by competing with calcineurin/PPP3CA for NFAT protein binding, hence preventing NFAT

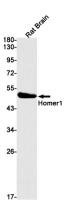

activation by PPP3CA (PubMed: 18218901).

Cellular Location Cytoplasm. Postsynaptic density. Synapse. Cell projection, dendritic spine

{ECO:0000250|UniProtKB:Q9Z214}. Note=Isoform 1 inhibits surface
