

# Leukotriene A4 Hydrolase Rabbit mAb

Catalog # AP75672

#### **Product Information**

**Application** WB, IHC-P **Primary Accession** P09960

Reactivity Human, Mouse, Rat

**Host** Rabbit

**Clonality** Monoclonal Antibody

Calculated MW 69285

#### **Additional Information**

**Gene ID** 4048

Other Names LTA4H

**Dilution** WB~~1/500-1/1000 IHC-P~~N/A

Format 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA.

**Storage** Store at 4°C short term. Aliquot and store at -20°C long term. Avoid

freeze/thaw cycles.

### **Protein Information**

Name LTA4H

Synonyms LTA4

**Function** Bifunctional zinc metalloenzyme that comprises both epoxide hydrolase (EH)

and aminopeptidase activities. Acts as an epoxide hydrolase to catalyze the conversion of LTA4 to the pro-inflammatory mediator leukotriene B4 (LTB4)

(PubMed:<u>11917124</u>, PubMed:<u>12207002</u>, PubMed:<u>15078870</u>,

PubMed: 18804029, PubMed: 1897988, PubMed: 1975494, PubMed: 2244921). Also has aminopeptidase activity, with high affinity for N-terminal arginines of various synthetic tripeptides (PubMed: 18804029, PubMed: 20813919). In

addition to its pro-inflammatory EH activity, may also counteract

inflammation by its aminopeptidase activity, which inactivates by cleavage another neutrophil attractant, the tripeptide Pro-Gly-Pro (PGP), a bioactive fragment of collagen generated by the action of matrix metalloproteinase-9

(MMP9) and prolylendopeptidase (PREPL) (PubMed: 20813919,

PubMed:<u>24591641</u>). Involved also in the biosynthesis of resolvin E1 and 18S-resolvin E1 from eicosapentaenoic acid, two lipid mediators that show potent anti- inflammatory and pro-resolving actions (PubMed:<u>21206090</u>).

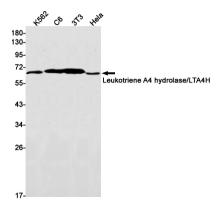

**Cellular Location** 

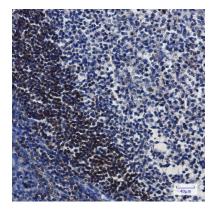

Cytoplasm.

**Tissue Location** 

Isoform 1 and isoform 2 are expressed in monocytes, lymphocytes, neutrophils, reticulocytes, platelets and fibroblasts
