

Rab7B Rabbit mAb

Catalog # AP75990

Product Information

Application	WB
Primary Accession	Q96AH8
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	22511

Additional Information

Gene ID	338382
Other Names	RAB7B
Dilution	WB~~1/500-1/1000
Format	Liquid

Protein Information

Name	RAB7B
Function	Controls vesicular trafficking from endosomes to the trans- Golgi network (TGN). Acts as a negative regulator of TLR9 signaling and can suppress TLR9-triggered TNFA, IL6, and IFNB production in macrophages by promoting TLR9 lysosomal degradation. Also negatively regulates TLR4 signaling in macrophages by promoting lysosomal degradation of TLR4. Promotes megakaryocytic differentiation by increasing NF-kappa-B-dependent IL6 production and subsequently enhancing the association of STAT3 with GATA1. Not involved in the regulation of the EGF- and EGFR degradation pathway.
Cellular Location	Late endosome. Lysosome Golgi apparatus. Golgi apparatus, trans- Golgi network. Cytoplasmic vesicle, phagosome. Cytoplasmic vesicle, phagosome membrane; Lipid-anchor; Cytoplasmic side. Note=Recruited to phagosomes containing S.aureus or M.tuberculosis.
Tissue Location	Expressed in heart, placenta, lung, skeletal muscle and peripheral blood leukocyte.
