SP1 Rabbit mAb

Catalog # AP76110

Product Information

Application WB, IHC-P, IHC-F, ICC

Primary Accession P08047

Reactivity Human, Mouse

Host Rabbit

Clonality Monoclonal Antibody

Calculated MW 80693

Additional Information

Gene ID 6667

Other Names SP1

Dilution WB~~1/500-1/1000 IHC-P~~N/A IHC-F~~N/A ICC~~N/A

Format 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA.

Protein Information

Name SP1

Synonyms TSFP1

Function Transcription factor that can activate or repress transcription in response to

physiological and pathological stimuli. Binds with high affinity to GC-rich motifs and regulates the expression of a large number of genes involved in a variety of processes such as cell growth, apoptosis, differentiation and immune responses. Highly regulated by post-translational modifications (phosphorylations, sumoylation, proteolytic cleavage, glycosylation and acetylation). Also binds the PDGFR-alpha G-box promoter. May have a role in modulating the cellular response to DNA damage. Implicated in chromatin remodeling. Plays an essential role in the regulation of FE65 gene expression. In complex with ATF7IP, maintains telomerase activity in cancer cells by inducing TERT and TERC gene expression. Isoform 3 is a stronger activator of transcription than isoform 1. Positively regulates the transcription of the core

clock component BMAL1 (PubMed:<u>10391891</u>, PubMed:<u>11371615</u>, PubMed:<u>11904305</u>, PubMed:<u>14593115</u>, PubMed:<u>16377629</u>, PubMed:<u>16478997</u>, PubMed:<u>16943418</u>, PubMed:<u>17049555</u>,

PubMed:<u>18171990</u>, PubMed:<u>18199680</u>, PubMed:<u>18239466</u>,

PubMed:<u>18513490</u>, PubMed:<u>18619531</u>, PubMed:<u>19193796</u>, PubMed:<u>20091743</u>, PubMed:<u>21046154</u>, PubMed:<u>21798247</u>). Plays a role in the

recruitment of SMARCA4/BRG1 on the c-FOS promoter. Plays a role in

protecting cells against oxidative stress following brain injury by regulating

the expression of RNF112 (By similarity).

Cellular Location Nucleus. Cytoplasm. Note=Nuclear location is governed by

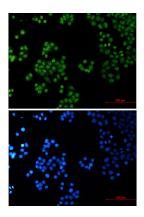

glycosylated/phosphorylated states. Insulin promotes nuclear location, while

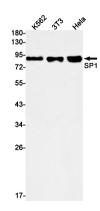

glucagon favors cytoplasmic location

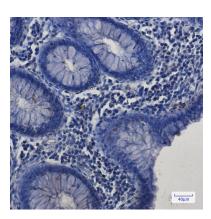

Tissue Location Up-regulated in adenocarcinomas of the stomach (at protein level). Isoform 3

is ubiquitously expressed at low levels
