

T Box Protein 3 Rabbit mAb

Catalog # AP76156

Product Information

Application	WB
Primary Accession	O15119
Reactivity	Rat, Human, Mouse
Host	Rabbit
Clonality	Monoclonal Antibody
Isotype	IgG
Conjugate	Unconjugated
Purification	Affinity Purified
Calculated MW	79389

Additional Information

Gene ID	6926
Other Names	TBX3
Dilution	WB~~1:1000-1:5000
Format	Liquid in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA.
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.

Protein Information

Name	TBX3
Function	Transcriptional repressor involved in developmental processes (PubMed: 10468588). Binds to the palindromic T site 5'-TTCACACCTAGGTGTGAA-3' DNA sequence, or a half-site, which are present in the regulatory region of several genes (PubMed: 12000749). Probably plays a role in limb pattern formation (PubMed: 10468588). Required for mammary placode induction, and maintenance of the mammary buds during development (By similarity). Involved in branching morphogenesis in both developing lungs and adult mammary glands, via negative modulation of target genes; acting redundantly with TBX2 (By similarity). Required, together with TBX2, to maintain cell proliferation in the embryonic lung mesenchyme; perhaps acting downstream of SHH, BMP and TGFbeta signaling (By similarity). Involved in modulating early inner ear development, acting independently of, and also redundantly with, TBX2 in different subregions of the developing ear (By similarity). Acts as a negative regulator of PML function in cellular senescence (PubMed: 22002537).

Cellular Location Nucleus {ECO:0000255 | PROSITE-ProRule:PRU00201}.

Tissue Location Widely expressed.

Background

Transcriptional repressor involved in developmental processes. Probably plays a role in limb pattern formation.

Images

Western blot analysis of Tbx3 in 3T3 lysates using T Box Protein 3 antibody.
