

# DGKA Rabbit mAb

Catalog # AP76467

## Product Information

---

Application	WB, IHC-P, IP
Primary Accession	<a href="#">P23743</a>
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	82630

## Additional Information

---

Gene ID	1606
Other Names	DGKA
Dilution	WB~~1/500-1/1000 IHC-P~~N/A IP~~N/A
Format	Liquid

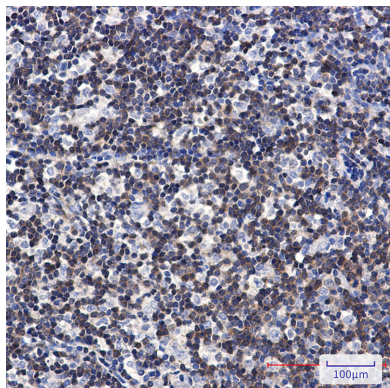

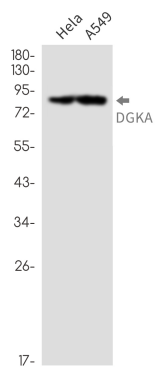

## Protein Information

---

Name	DGKA
Synonyms	DAGK, DAGK1
Function	<p>Diacylglycerol kinase that converts diacylglycerol/DAG into phosphatidic acid/phosphatidate/PA and regulates the respective levels of these two bioactive lipids (PubMed:<a href="#">15544348</a>, PubMed:<a href="#">2175712</a>). Thereby, acts as a central switch between the signaling pathways activated by these second messengers with different cellular targets and opposite effects in numerous biological processes (PubMed:<a href="#">15544348</a>, PubMed:<a href="#">2175712</a>). Also plays an important role in the biosynthesis of complex lipids (Probable). Can also phosphorylate 1-alkyl-2- acylglycerol in vitro as efficiently as diacylglycerol provided it contains an arachidonoyl group (PubMed:<a href="#">15544348</a>). Also involved in the production of alkyl-lysophosphatidic acid, another bioactive lipid, through the phosphorylation of 1-alkyl-2-acetyl glycerol (PubMed:<a href="#">22627129</a>).</p>
Cellular Location	Cytoplasm, cytosol.
Tissue Location	Expressed in lymphocytes.
