

# Tyrosine Protein Kinase HCK Rabbit mAb

Catalog # AP76521

## **Product Information**

Application	WB, IP, ICC
Primary Accession	<u>P08631</u>
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	59600

### **Additional Information**

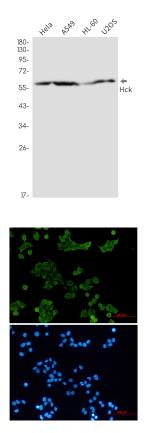

Gene ID	3055
Other Names	НСК
Dilution	WB~~1/500-1/1000 IP~~N/A ICC~~N/A
Format	50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA.
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.

## **Protein Information**

Name	НСК
Function	Non-receptor tyrosine-protein kinase found in hematopoietic cells that transmits signals from cell surface receptors and plays an important role in the regulation of innate immune responses, including neutrophil, monocyte, macrophage and mast cell functions, phagocytosis, cell survival and proliferation, cell adhesion and migration. Acts downstream of receptors that bind the Fc region of immunoglobulins, such as FCGR1A and FCGR2A, but also CSF3R, PLAUR, the receptors for IFNG, IL2, IL6 and IL8, and integrins, such as ITGB1 and ITGB2. During the phagocytic process, mediates mobilization of secretory lysosomes, degranulation, and activation of NADPH oxidase to bring about the respiratory burst. Plays a role in the release of inflammatory molecules. Promotes reorganization of the actin cytoskeleton and actin polymerization, formation of podosomes and cell protrusions. Inhibits TP73-mediated transcription activation and TP73-mediated apoptosis. Phosphorylates CBL in response to activation of immunoglobulin gamma Fc region receptors. Phosphorylates ADAM15, BCR, ELMO1, FCGR2A, GAB1, GAB2, RAPGEF1, STAT5B, TP73, VAV1 and WAS.
Cellular Location	[Isoform 1]: Lysosome. Membrane; Lipid-anchor. Cell projection, podosome

membrane; Lipid-anchor. Cytoplasm, cytosol Note=Associated with<br/>specialized secretory lysosomes called azurophil granules. At least half of this<br/>isoform is found in the cytoplasm, some of this fraction is myristoylated<br/>Cytoplasmic vesicle, secretory vesicle. Cytoplasm, cytosolTissue LocationDetected in monocytes and neutrophils (at protein level). Expressed<br/>predominantly in cells of the myeloid and B-lymphoid lineages. Highly<br/>expressed in granulocytes. Detected in tonsil
