

# RBM3 Rabbit mAb

Catalog # AP76691

## Product Information

---

<b>Application</b>	WB, IHC-P, FC
<b>Primary Accession</b>	<a href="#">P98179</a>
<b>Reactivity</b>	Rat, Human, Mouse
<b>Host</b>	Rabbit
<b>Clonality</b>	Monoclonal Antibody
<b>Isotype</b>	IgG
<b>Conjugate</b>	Unconjugated
<b>Purification</b>	Affinity Purified
<b>Calculated MW</b>	17170

## Additional Information

---

<b>Gene ID</b>	5935
<b>Other Names</b>	RBM3
<b>Dilution</b>	WB~~1:1000 IHC-P~~N/A FC~~1:10~50
<b>Format</b>	Liquid in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA.
<b>Storage</b>	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.

## Protein Information

---

<b>Name</b>	RBM3
<b>Synonyms</b>	RNPL
<b>Function</b>	Cold-inducible mRNA binding protein that enhances global protein synthesis at both physiological and mild hypothermic temperatures. Reduces the relative abundance of microRNAs, when overexpressed. Enhances phosphorylation of translation initiation factors and active polysome formation (By similarity).
<b>Cellular Location</b>	Nucleus. Cytoplasm. Cell projection, dendrite. Note=Localizes in mRNA granules in dendrites.

## Background

---

RBM3, also named as RNPL, is a cold-inducible mRNA binding protein that enhances global protein synthesis

at both physiological and mild hypothermic temperatures. It reduces the relative abundance of microRNAs, when overexpressed. RBM3 enhances phosphorylation of translation initiation factors and active polysome formation. It is up-regulated in human tumors. RBM3 is a potential proto-oncogenic proteins upon overexpression. (PMID: 19900510 ).
