

# FBP1 Rabbit mAb

Catalog # AP78207

## Product Information

---

|                          |   |
|--------------------------|---|
| <b>Application</b>       | WB, IHC-P                                     |
| <b>Primary Accession</b> | <a href="#">P09467</a>                        |
| <b>Reactivity</b>        | Rat, Human, Mouse                             |
| <b>Host</b>              | Rabbit  |
| <b>Clonality</b>         | Monoclonal Antibody                           |
| <b>Isotype</b>           | IgG   |
| <b>Conjugate</b>         | Unconjugated                                  |
| <b>Immunogen</b>         | A synthesized peptide derived from human FBP1 |
| <b>Purification</b>      | Affinity Purified                             |
| <b>Calculated MW</b>     | 36842   |

## Additional Information

---

|                    |  |
|--------------------|--|
| <b>Gene ID</b>     | 2203   |
| <b>Other Names</b> | FBP1   |
| <b>Dilution</b>    | WB~~1/500-1/1000 IHC-P~~N/A  |
| <b>Format</b>      | Liquid in 10mM PBS, pH 7.4, 150mM sodium chloride, 0.05% BSA, 0.02% sodium azide and 50% glycerol. |
| <b>Storage</b>     | Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.           |

## Protein Information

---

|                        |  |
|------------------------|--|
| <b>Name</b>            | FBP1   |
| <b>Synonyms</b>        | FBP  |
| <b>Function</b>        | Catalyzes the hydrolysis of fructose 1,6-bisphosphate to fructose 6-phosphate in the presence of divalent cations, acting as a rate-limiting enzyme in gluconeogenesis. Plays a role in regulating glucose sensing and insulin secretion of pancreatic beta-cells. Appears to modulate glycerol gluconeogenesis in liver. Important regulator of appetite and adiposity; increased expression of the protein in liver after nutrient excess increases circulating satiety hormones and reduces appetite-stimulating neuropeptides and thus seems to provide a feedback mechanism to limit weight gain. |
| <b>Tissue Location</b> | Expressed in pancreatic islets.  |
