

APEX2 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP8975C

Product Information

Application WB, IHC-P, FC, IF, E

Primary Accession Q9UBZ4 Reactivity Human Host Rabbit Clonality Polyclonal Isotype Rabbit IgG **Clone Names** RB23043 **Calculated MW** 57401 **Antigen Region** 143-171

Additional Information

Gene ID 27301

Other Names DNA-(apurinic or apyrimidinic site) lyase 2, 31--, AP endonuclease XTH2, APEX

nuclease 2, APEX nuclease-like 2, Apurinic-apyrimidinic endonuclease 2, AP

endonuclease 2, APEX2, APE2, APEXL2, XTH2

Target/Specificity This APEX2 antibody is generated from rabbits immunized with a KLH

conjugated synthetic peptide between 143-171 amino acids from the Central

region of human APEX2.

Dilution WB~~1:1000 IHC-P~~1:100~500 FC~~1:10~50 IF~~1:25 E~~Use at an assay

dependent concentration.

Format Purified polyclonal antibody supplied in PBS with 0.05% (V/V) Proclin 300. This

antibody is purified through a protein A column, followed by peptide affinity

purification.

Storage Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store

at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions APEX2 Antibody (Center) is for research use only and not for use in diagnostic

or therapeutic procedures.

Protein Information

Name APEX2

Synonyms APE2, APEXL2, XTH2

Function

Functions as a weak apurinic/apyrimidinic (AP) endodeoxyribonuclease in the DNA base excision repair (BER) pathway of DNA lesions induced by oxidative and alkylating agents (PubMed: 16687656). Initiates repair of AP sites in DNA by catalyzing hydrolytic incision of the phosphodiester backbone immediately adjacent to the damage, generating a single-strand break with 5'-deoxyribose phosphate and 3'-hydroxyl ends. Also displays double-stranded DNA 3'-5' exonuclease, 3'-phosphodiesterase activities (PubMed: 16687656, PubMed: 19443450, PubMed: 32516598). Shows robust 3'-5' exonuclease activity on 3'-recessed heteroduplex DNA and is able to remove mismatched nucleotides preferentially (PubMed: 16687656, PubMed: 19443450). Also exhibits 3'-5' exonuclease activity on a single nucleotide gap containing heteroduplex DNA and on blunt-ended substrates (PubMed: 16687656). Shows fairly strong 3'-phosphodiesterase activity involved in the removal of 3'-damaged termini formed in DNA by oxidative agents (PubMed: 16687656, PubMed: 19443450). In the nucleus functions in the PCNA-dependent BER pathway (PubMed: 11376153). Plays a role in reversing blocked 3' DNA ends, problematic lesions that preclude DNA synthesis (PubMed:32516598). Required for somatic hypermutation (SHM) and DNA cleavage step of class switch recombination (CSR) of immunoglobulin genes (By similarity). Required for proper cell cycle progression during proliferation of peripheral lymphocytes (By similarity).

Cellular Location

Nucleus {ECO:0000255 | PROSITE-ProRule:PRU00764, ECO:0000269 | PubMed:11376153, ECO:0000269 | PubMed:19443450}. Cytoplasm Mitochondrion. Note=Together with PCNA, is redistributed in discrete nuclear foci in presence of oxidative DNA damaging agents.

Tissue Location

Highly expressed in brain and kidney. Weakly expressed in the fetal brain.

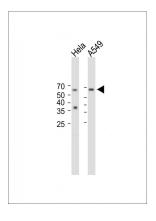

Background

APEX2 may participate in both nuclear and mitochondrial post-replicative base excision repair (BER). In the nucleus functions in the PCNA-dependent BER pathway.
