GFP Antibody

Rabbit mAb
Catalog # AP90027

Product Information

Application	WB
Primary Accession	P42212
Clonality	Monoclonal
Other Names	GFP ; yfp ; Green fluorescent protein ;
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	26886

Additional Information

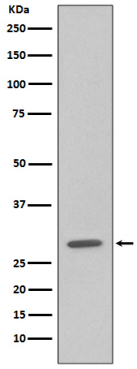

Dilution	WB 1:3000~1:10000
Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from green fluorescent protein
Description	Green fluorescent protein(GFP) has been engineered to produce a vast number of variously colored mutants, fusion proteins, and biosensors. Fluorescent proteins and its mutated allelic forms, blue, cyan and yellow have become a useful and ubiquitous tool for making chimeric proteins, where they function as a fluorescent protein tag. Typically they tolerate N- and C-terminal fusion to a broad variety of proteins.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

Protein Information

Name	GFP
Function	Energy-transfer acceptor. Its role is to transduce the blue chemiluminescence of the protein aequorin into green fluorescent light by energy transfer. Fluoresces in vivo upon receiving energy from the Ca(2+)-activated photoprotein aequorin.
Tissue Location	Photocytes.

Images

Western blot analysis of GFP expression in 293 cell lysate transfected with GFP.
