# Vinculin Antibody

Rabbit mAb Catalog # AP90215

#### **Product Information**

Application WB, IF, ICC, IP

Primary Accession P18206

Reactivity Rat, Human, Mouse

**Clonality** Monoclonal

Other Names Vinculin; VCL; Metavinculin; MV;

IsotypeRabbit IgGHostRabbitCalculated MW123799

### **Additional Information**

**Dilution** WB 1:10000~1:20000 ICC/IF 1:50~1:200 IP 1:50

**Purification** Affinity-chromatography

**Immunogen** A synthesized peptide derived from human Vinculin

**Description** Vinculin is a cytoskeletal protein that plays an important role in the regulation

of focal adhesions and embryonic development. Three structural vinculin domains include an amino-terminal head, a short, flexible proline-rich region and a carboxy-terminal tail. In the inactive state, the head and tail domains of vinculin interact to form a closed confirmation. The open and active form of vinculin translocates to focal adhesions where it is thought to be involved in

anchoring F-actin to the membrane and regulation of cell migration.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

### **Protein Information**

Name VCL

**Function** Actin filament (F-actin)-binding protein involved in cell- matrix adhesion and

cell-cell adhesion. Regulates cell-surface E- cadherin expression and potentiates mechanosensing by the E-cadherin complex. May also play

important roles in cell morphology and locomotion.

Cellular Location Cell membrane {ECO:0000250 | UniProtKB:P12003}; Peripheral membrane

protein {ECO:0000250 | UniProtKB:P12003}; Cytoplasmic side

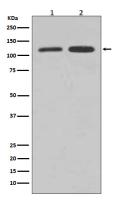

{ECO:0000250 | UniProtKB:P12003}. Cell junction, adherens junction {ECO:0000250 | UniProtKB:P12003}. Cell junction, focal adhesion {ECO:0000250 | UniProtKB:P12003}. Cytoplasm, cytoskeleton {ECO:0000250 | UniProtKB:P85972}. Cell membrane, sarcolemma {ECO:0000250 | UniProtKB:Q64727}; Peripheral membrane protein

{ECO:0000250 | UniProtKB:Q64727}; Cytoplasmic side {ECO:0000250 | UniProtKB:Q64727}. Cell projection, podosome {ECO:0000250 | UniProtKB:Q64727}. Note=Recruitment to cell-cell junctions occurs in a myosin II-dependent manner. Interaction with CTNNB1 is necessary for its localization to the cell-cell junctions {ECO:0000250 | UniProtKB:P12003}

#### **Tissue Location**

Metavinculin is muscle-specific.
