

CD11b Antibody

Rabbit mAb Catalog # AP90256

Product Information

Application WB, IHC, IF, FC, ICC, IP, IHF

Primary Accession P11215 Reactivity Human Clonality Monoclonal

Other Names CR3A; MO1A; CD11B; MAC-1; MAC1A; SLEB6;

Isotype Rabbit IgG Host Rabbit 127179 Calculated MW

Additional Information

Dilution WB 1:500~1:2000 IHC 1:50~1:200 ICC/IF 1:50~1:200 IP 1:50 FC 1:50

Purification Affinity-chromatography

A synthesized peptide derived from human CD11b **Immunogen**

ITGAM, also named as CD11B and CR3A, belongs to the integrin alpha chain **Description**

family. It is implicated in various adhesive interactions of monocytes, macrophages and granulocytes as well as in mediating the uptake of complement-coated particles. ITGAM is identical with CR-3, the receptor for the iC3b fragment of the third complement component. It probably

recognizes the R-G-D peptide in C3b.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name **ITGAM**

CD11B, CR3A **Synonyms**

Function Integrin ITGAM/ITGB2 is implicated in various adhesive interactions of

monocytes, macrophages and granulocytes as well as in mediating the uptake

of complement-coated particles and pathogens (PubMed: 20008295,

PubMed: 9558116). It is identical with CR-3, the receptor for the iC3b fragment

of the third complement component. It probably recognizes the R-G-D peptide in C3b. Integrin ITGAM/ITGB2 is also a receptor for fibrinogen, factor X and ICAM1. It recognizes P1 and P2 peptides of fibrinogen gamma chain. Regulates neutrophil migration (PubMed: 28807980). In association with beta subunit ITGB2/CD18, required for CD177-PRTN3-mediated activation of TNF primed neutrophils (PubMed:<u>21193407</u>). May regulate phagocytosis-induced apoptosis in extravasated neutrophils (By similarity). May play a role in mast

cell development (By similarity). Required with TYROBP/DAP12 in microglia to control production of microglial superoxide ions which promote the neuronal

apoptosis that occurs during brain development (By similarity).

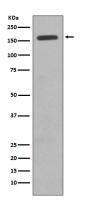

Cellular Location Cell membrane; Single-pass type I membrane protein. Membrane raft;

Single-pass type I membrane protein

Tissue Location Predominantly expressed in monocytes and granulocytes (PubMed:1346576).

Expressed in neutrophils (at protein level) (PubMed:21193407).
