

Cdc25B Antibody

Rabbit mAb Catalog # AP90932

Product Information

ApplicationWB, IPPrimary AccessionP30305ReactivityHumanClonalityMonoclonal

Other Names CDC25HU2; CDC25M2; Dual specificity phosphatase Cdc25B; EC 3.1.3.48;

M-phase inducer phosphatase 2; MPIP2;

IsotypeRabbit IgGHostRabbitCalculated MW64987

Additional Information

Dilution WB 1:500~1:2000 IP 1:50 **Purification** Affinity-chromatography

Immunogen A synthesized peptide derived from human Cdc25B

Description CDC25B is a member of the CDC25 family of phosphatases. CDC25B activates

the cyclin dependent kinase CDC2 by removing two phosphate groups and it is required for entry into mitosis. CDC25B shuttles between the nucleus and the cytoplasm due to nuclear localization and nuclear export signals.

the cytopiasm due to nuclear localization and nuclear export signals.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name CDC25B

Synonyms CDC25HU2

Function Tyrosine protein phosphatase which functions as a dosage- dependent

inducer of mitotic progression (PubMed:<u>1836978</u>, PubMed:<u>20360007</u>). Directly dephosphorylates CDK1 and stimulates its kinase activity

(PubMed:20360007). Required for G2/M phases of the cell cycle progression

and abscission during cytokinesis in a ECT2-dependent manner

(PubMed: 17332740). The three isoforms seem to have a different level of

activity (PubMed: 1836978).

Cytoplasm, cytoskeleton, microtubule organizing center, centrosome.

Cytoplasm, cytoskeleton, spindle pole
