

Bcl-2 Antibody

Rabbit mAb

Catalog # AP91148

Product Information

| | |
|--------------------------|----------------------------------|
| Application | WB, IHC, IF, FC, ICC, IHF |
| Primary Accession | P10415 |
| Reactivity | Human, Mouse |
| Clonality | Monoclonal |
| Other Names | Apoptosis regulator Bcl-2; BCL2; |
| Isotype | Rabbit IgG |
| Host | Rabbit |
| Calculated MW | 26266 |

Additional Information

| | |
|-------------------------------------|---|
| Dilution | WB 1:1000~1:2000 IHC 1:50~1:200 ICC/IF 1:50~1:200 FC 1:50 |
| Purification | Affinity-chromatography |
| Immunogen | A synthesized peptide derived from human Bcl-2 |
| Description | This gene encodes an integral outer mitochondrial membrane protein that blocks the apoptotic death of some cells such as lymphocytes. Constitutive expression of BCL2, such as in the case of translocation of BCL2 to Ig heavy chain locus, is thought to be the cause of follicular lymphoma. Two transcript variants, produced by alternate splicing, differ in their C-terminal ends. |
| Storage Condition and Buffer | Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle. |

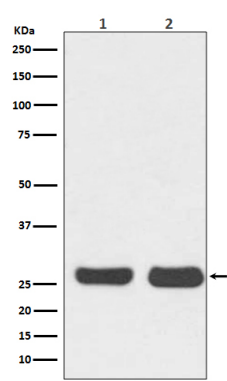

Protein Information

| | |
|--------------------------|--|
| Name | BCL2 |
| Function | Suppresses apoptosis in a variety of cell systems including factor-dependent lymphohematopoietic and neural cells (PubMed: 1508712 , PubMed: 8183370). Regulates cell death by controlling the mitochondrial membrane permeability (PubMed: 11368354). Appears to function in a feedback loop system with caspases (PubMed: 11368354). Inhibits caspase activity either by preventing the release of cytochrome c from the mitochondria and/or by binding to the apoptosis-activating factor (APAF-1) (PubMed: 11368354). Also acts as an inhibitor of autophagy: interacts with BECN1 and AMBRA1 during non-starvation conditions and inhibits their autophagy function (PubMed: 18570871 , PubMed: 20889974 , PubMed: 21358617). May attenuate inflammation by impairing NLRP1- inflammasome activation, hence CASP1 activation and IL1B release (PubMed: 17418785). |
| Cellular Location | Mitochondrion outer membrane; Single-pass membrane protein. Nucleus |

membrane; Single-pass membrane protein. Endoplasmic reticulum
membrane; Single-pass membrane protein. Cytoplasm
{ECO:0000250|UniProtKB:P10417}

Tissue Location Expressed in a variety of tissues.
