

GATA4 Antibody

Rabbit mAb Catalog # AP91244

Product Information

Application WB, IF, FC, ICC

Primary Accession P43694

Reactivity Rat, Human, Mouse

Clonality Monoclonal

Other Names ASD2; GATA 4; GATA binding protein 4; gata4; Transcription factor GATA 4;

VSD1;

IsotypeRabbit IgGHostRabbitCalculated MW44565

Additional Information

Dilution WB 1:500~1:2000 ICC/IF 1:50~1:200 FC 1:100

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human GATA4

Description Involved in bone morphogenetic protein (BMP)-mediated induction of

cardiac-specific gene expression (By similarity). Binds to BMP response element (BMPRE) DNA sequences within cardiac activating regions (By similarity). Acts as a transcriptional activator of ANF in cooperation with

NKX2-5 (By similarity).

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium

azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term.

Avoid freeze / thaw cycle.

Protein Information

Name GATA4

Function Transcriptional activator that binds to the consensus sequence 5'-AGATAG-3'

and plays a key role in cardiac development and function (PubMed:<u>24000169</u>, PubMed:<u>27984724</u>, PubMed:<u>35182466</u>). In cooperation with TBX5, it binds to cardiac super-enhancers and promotes cardiomyocyte gene expression, while

it down-regulates endocardial and endothelial gene expression (PubMed: 27984724). Involved in bone morphogenetic protein

(BMP)-mediated induction of cardiac-specific gene expression. Binds to BMP response element (BMPRE) DNA sequences within cardiac activating regions (By similarity). Acts as a transcriptional activator of ANF in cooperation with

NKX2-5 (By similarity). Promotes cardiac myocyte enlargement (PubMed: 20081228). Required during testicular development

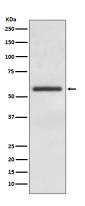

(PubMed:<u>21220346</u>). May play a role in sphingolipid signaling by regulating

the expression of sphingosine-1- phosphate degrading enzyme,

Cellular Location

Nucleus
