MRP2 Antibody

Rabbit mAb
Catalog # AP91288

Product Information

Application	WB, IF, FC, ICC
Primary Accession	Q92887
Reactivity	Human
Clonality	Monoclonal
Other Names	ABC30; abcC2; CMOAT1; cMRP;
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	174207

Additional Information

Dilution	WB 1:500~1:2000 ICC/IF 1:50~1:200 FC 1:100
Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human MRP2
Description	Mediates hepatobiliary excretion of numerous organic anions. May function as a cellular cisplatin transporter.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

Protein Information

Name	ABCC2 {ECO:0000303|PubMed:31704245, ECO:0000312|HGNC:HGNC:53}
Function	ATP-dependent transporter of the ATP-binding cassette (ABC) family that hydrolyzes ATP to enable active transport of substrates conjugated with glucuronate, glutathione or sulfate. Operates at apical membranes of polarized cells such as hepatocytes, renal and intestinal epithelial cells where it mediates hepatobiliary and renal excretion of conjugated substrates (PubMed:10220572, PubMed:10421658, PubMed:11500505, PubMed:16332456, PubMed:29175180, PubMed:30959153, PubMed:31704245). Involved in canalicular bile production. Mediates hepatobiliary excretion of mono- and bis-glucuronidated bilirubin, enabling bilirubin detoxification (PubMed:9355767, PubMed:10421658). Mediates the efflux of steroid glucuronates from intestine and liver into the intestinal lumen. Shares substrate specificity with MRP3 but displays lower affinity and higher transport velocity toward androgen conjugates such as testosterone and dihydrotestosterone glucuronates as well as toward estrogen conjugates including estradiol, estrone and estriol glucuronates (PubMed:29175180, PubMed:30959153, PubMed:31704245). Transports glutathione conjugate leukotriene C4 (LTC4) and related cysteinyl leukotrienes (PubMed:11500505).

Displays selective transporter activity toward sulfated conjugates, transports sulfated bile salts such as taurolithocholate sulfate but is inactive toward androgen sulfates (PubMed:16332456, PubMed:39993711). Transports various xenobiotics including anticancer drugs, such as anthracycline, vinca alkaloid and methotrexate and HIV-drugs such as protease inhibitors. Confers resistance to several anticancer drugs including cisplatin, doxorubicin, epirubicin, methotrexate, etoposide and vincristine, by decreasing accumulation of these drugs in cells (PubMed:10220572, PubMed:11500505, PubMed:12441801).

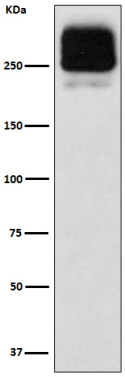

Cellular Location

Apical cell membrane; Multi-pass membrane protein. Note=Localized to the apical membrane of enterocytes

Tissue Location

Expressed by polarized cells in liver, kidney and intestine. The highest expression is found in liver. Expressed in small intestine (PubMed:28408210).

Images

Western blot analysis of MRP2 expression in HepG2 cell lysate.
